

Vijay Prakash Tiwari

Senior Software Engineer · Tech Lead · Distributed Systems & Agentic AI

Pune, Maharashtra, India · +91-9960770157 · vijayptiwari28@gmail.com · linkedin.com/in/vijayptiwari · github.com/vijayptiwari · vijayptiwari.github.io

PROFESSIONAL SUMMARY

Tech Lead and Senior Software Engineer with 9 years of experience shipping telecom-scale Real-Time Billing platforms and agentic AI systems — currently leading a team of 3 on a zero-code agent platform for Digital BSS. Global Amdocs Inspiring Innovator nominee (only Asian among nominees); creator of Meridian, an open-source multi-agent AI product.

Impact: 6+ years Digital BSS billing R&D · Team of 3 · 2,000+ eng. hours saved/year (~50 engineer-weeks) · 5 billing domains (taxation, invoicing, B2B2X, IoT, NaaS) · 2/3 global Avishkar wins among 104 teams · CodeVita rank 716 (top 0.2% of 400,000+) · 3 enterprise clients at TIBCO (Macy's, United Airlines, Indian Railways)

Expertise in Java, Python, Kafka, Kubernetes, and OpenShift with proven system design (LLD/HLD), technical leadership, and production delivery across mission-critical 24/7 billing environments.

PROFESSIONAL EXPERIENCE

Amdocs Development Centre India LLP

Tech Lead — Agentic Offering, Billing Domain · AI System Design & Implementation

Pune, India · Jan 2026 – Present · Team Lead · Team of 3 · Digital BSS · Real-Time Billing

- Lead system design and delivery of a zero-code agentic platform for Digital BSS Real-Time Billing — architecture, roadmap, and execution for a team of 3 on OpenShift/Argo CD.
- Built foundation SDK enabling billing teams to create business agents and MCP servers without custom code; automated OpenAPI-to-MCP conversion (tools, prompts, resources, A2A cards) with CI deliverable pipelines.
- Shipped versioned RAG with ingestion pipeline, rollback, dynamic/static knowledge referencing, retrieval with citations, tool RBAC, and AI/infrastructure guardrails for production agentic workloads.

Amdocs Development Centre India LLP

Software Engineering Specialist — Backend & Microservices

Pune, India · Dec 2022 – Dec 2025 · Amdocs Technology BSS R&D · Telecom Billing

- Built Java/Spring Boot microservices for Real-Time Billing on OpenShift/Kubernetes across 5 production domains — taxation, invoicing, B2B2X, IoT, and NaaS — deployed to tier-1 global telecom operator environments.
- 6+ years on Amdocs Digital BSS billing R&D; authored LLD/HLD, led Kafka event-driven integrations, code reviews, and cross-module solution design for platform modules.
- Delivered one-click release automation saving 2,000+ man-hours annually (~50 engineer-weeks); recognized as Amdocs Inspiring Innovator global nominee (only Asian among nominees).
- Built Event-Ore (Kafka debugging in restricted K8s namespaces) and Trapper (AI-assisted RCA); won 2 of 3 global Avishkar titles among 104 teams.

Amdocs Development Centre India LLP

Software Developer — Advanced & Experienced

Pune, India · Jan 2020 – Nov 2022 · Backend Microservices · REST APIs · Agile Delivery

- Developed billing microservices and REST APIs over 3 years on agile delivery squads for mission-critical 24/7 Real-Time Billing services.
- Resolved production incidents via root-cause analysis and performance tuning; shipped backward-compatible enhancements under strict SLA constraints.

TIBCO Software India Pvt. Ltd.

Junior Consultant — Enterprise Integration

Pune, India · Jul 2017 – Dec 2019 · SOA · TIBCO BusinessEvents · Java

- Delivered enterprise integrations for Macy's (loyalty migration), United Airlines (MCT, pricing/refund validation), and Indian Railways CRIS — using TIBCO BusinessEvents, Java, and SOAP/REST services.
- Conducted performance testing and bottleneck analysis (JMeter, SOAP UI) for presales and production delivery.

CORE COMPETENCIES

Senior Software Engineer, Tech Lead, Solution Architect, System Design, LLD, HLD, Distributed Systems, Microservices, Agentic AI, LangGraph, MCP, RAG, Multi-Agent Systems, LLM Integration, Java, Python, Spring Boot, Spring AI, Apache Kafka, Kubernetes, OpenShift, Docker, CI/CD, DevOps, REST APIs, OpenAPI, Cloud-Native Architecture, Event-Driven Architecture, Digital BSS, Telecom Billing, Technical Leadership, Mentoring, Agile

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Node.js, SQL, Shell Scripting

Backend & Architecture: Spring Boot, Spring AI, Microservices, REST APIs, MS360 SDK, OpenAPI, Swagger, System Design, Solution Architecture, LLD, HLD, SOLID, OWASP

AI & Agentic Engineering: LangGraph, Langfuse, MCP, RAG, Multi-Agent Systems, Agent SDK, A2A, Spring AI, LLM Integration, AI Guardrails, Elasticsearch, PostgreSQL, Prompt Engineering, Playwright, AI-Assisted RCA

Integration & Data: Apache Kafka, Kafka Streams, Confluent, Event-Driven Architecture, Couchbase, SQL, NoSQL, SOAP, REST, TIBCO BusinessEvents

Cloud & DevOps: Kubernetes, OpenShift, Docker, Argo CD, CI/CD, Jenkins, Git, Maven, Cloud-Native Delivery, Release Automation, Production Support

Domain: Telecom Billing, Digital BSS, Real-Time Billing, 5G, B2B2X, IoT, NaaS, Taxation, Invoicing, Enterprise Integration

Practices: Agile, Technical Leadership, Team Leadership, Mentoring, Code Review, Innovation, Observability, Performance Testing, JMeter, SOAP UI

OPEN SOURCE

Meridian — Local-First Multi-Agent AI Career Platform

Creator & Maintainer · MIT License · github.com/vijayptiwari/meridian

Multi-agent pipeline (research, fit scoring, resume tailoring, application assistance) with Playwright portal integration — local-first, BYOK LLM, MIT-licensed open source.

EDUCATION

Bachelor of Engineering, Computer Engineering

Savitribai Phule Pune University · Bharati Vidyapeeth's College of Engineering, Lavale, Pune · 2013 – 2017

CERTIFICATIONS

- CD215: Couchbase Java Developer Course — Couchbase (Apr 2023)
- TCP-TIBCO BusinessEvents Certified Professional — TIBCO (May 2018)

HONORS AND AWARDS

- DevOps Champion & Innovation Enthusiast — Amdocs Development Centre India.
- TCS CodeVita Season V — global rank 716 (top 0.2% of 400,000+ participants).

PUBLICATIONS

7 peer-reviewed publications (IJIRCCE, IRJET, IJRITCC) on cloud security, biocomputing, and emerging technologies.
