

Vijay Prakash Tiwari

Senior Backend Engineer | Distributed Systems | Kafka | System Design | AI-Assisted Automation

Pune, India | +91-9960770157 | vijayptiwari28@gmail.com | github.com/vijayptiwari | linkedin.com/in/vijayptiwari

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing and building backend systems in the telecom domain. Strong experience across Java, Spring Boot, Kafka, Couchbase, Kubernetes, OpenShift, microservices, REST APIs, event-driven architecture, distributed systems, low-level design, cloud-native delivery, release automation, and production support.

Focused on scalable, maintainable, and observable systems, with growing emphasis on AI-assisted root-cause analysis, workflow automation, anomaly detection, and developer productivity tooling.

TECHNICAL SKILLS

Backend	Java, Spring Boot, REST APIs, Microservices, Low-Level Design, Object-Oriented Programming
Integration	Kafka, Confluent Kafka Streams, Event-Driven Architecture, Integration Patterns, SOAP, REST, Async Processing
Databases	Couchbase, SQL, NoSQL, Relational Database, Data Modeling
Cloud & DevOps	Kubernetes, OpenShift, Docker, CI/CD, Release Automation, Cloud-Native Delivery, Production Support
Architecture	Distributed Systems, Scalability, Fault Tolerance, Observability, SOLID, OWASP
Testing & Quality	Performance Testing, API Testing, JMeter, SOAP UI, Root Cause Analysis
AI Engineering	AI-Assisted RCA, Automation Agents, Workflow Intelligence, Anomaly Detection, Developer Productivity Tools

PROFESSIONAL EXPERIENCE

Amdocs Development Centre India LLP Jan 2020 - Present

Telecom Domain | Backend Engineering | Microservices | Integration

Software Engineering Specialist (Dec 2022 - Present) | Software Developer - Advanced (Dec 2021 - Nov 2022) | Software Developer - Experienced (Jan 2020 - Nov 2021)

- Designed and developed backend microservices and enterprise telecom platform modules using Java and Spring Boot.
- Delivered Kafka-based integrations and event-driven workflows across distributed backend systems.
- Contributed to low-level design, maintainable service architecture, API integration, and backward-compatible system enhancement.
- Built automation tooling to improve developer productivity, debugging support, and engineering workflow efficiency.
- Drove production support, issue investigation, root-cause analysis, and operational reliability improvements.
- Simplified release execution through CI/CD-oriented workflow improvements and repeatable deployment practices.

TIBCO Software India Pvt. Ltd. | Junior Consultant Jul 2017 - Dec 2019

Enterprise Integration | Java | TIBCO | SOA

- Built and supported enterprise integration solutions using TIBCO technologies and Java-backed services.
- Developed integration-heavy workflows involving web services, service orchestration, complex event processing, and message-driven processing.
- Supported solution delivery, issue analysis, and maintainable workflow behavior across business-critical systems.
- Contributed to performance testing and bottleneck identification using JMeter, SOAP UI, Java, and shell scripting.

SELECTED PROJECTS

Event-Ore

Kafka Monitoring & Debugging Tool

Designed a Kafka monitoring and debugging tool to improve topic, consumer, and message visibility in namespace-restricted environments.

Trapper

Automation Traffic Interceptor with AI-Assisted RCA

Built an automation traffic interceptor to capture workflow behavior, identify failure patterns, and support AI-assisted root-cause analysis.

One-Click Release Automation

Release Workflow Simplification

Designed a release workflow improvement concept to reduce manual deployment steps and improve repeatability.

EDUCATION

Bachelor of Engineering in Computer Engineering

Savitribai Phule Pune University | 2013 - 2017 | 70.64%

ACHIEVEMENTS

- Winner of Most Impacting Innovator at Amdocs for innovation work focused on engineering workflow improvement.
- Nominated for Amdocs Inspiring Innovator and won Amdocs Avishkar Tools 3.0 with 2 titles out of 3 among 104 teams.
- Secured global rank 716 in TCS CodeVita Season V 2016.

SELECTED PUBLICATIONS

- Cloud Data Security using DNA Cryptography Techniques - International Journal of Innovative Research in Computer and Communication Engineering.
- DNA Computing and Implementations - International Journal of Recent and Innovative Trends in Computing and Communication.
- LI-FI Technology, Implementations and Applications and Blue Brain Technology to Preserve Intelligence - International Research Journal of Engineering and Technology.

Additional published topics include Face Analysis for Improvised System Security using Laser Focus, Wearable Technology and Extended Applications, and Augmented Reality and Its Technologies.
