

Vijay Prakash Tiwari

Senior Software Engineer · AI Systems & Agent Infrastructure

Pune, Maharashtra, India · +91-9960770157 · vijayptiwari28@gmail.com · linkedin.com/in/vijayptiwari · github.com/vijayptiwari · vijayptiwari.github.io

github.com/vijayptiwari/meridian · github.com/vijayptiwari/eventore · github.com/vijayptiwari/agent-engineering-framework

PROFESSIONAL SUMMARY

AI Systems Engineer and Tech Lead with 9 years in production backend platforms — currently leading a team of 3 on agent infrastructure (MCP, RAG, guardrails) for enterprise workloads on Kubernetes. Creator of Meridian (local-first multi-agent product, MIT) and author of the Agent Engineering Framework white paper. Built Self Heal CD (150+ developers daily) and piloting Trapper — its AI agent evolution for automated RCA and fix PRs.

Impact: Self Heal CD — 150+ devs, 3 green runs/day · Trapper AI pilot (RCA + PR prep) · Project Ignite sole creator (66 ideas) · Team of 3 on agent platform · Avishkar People's Choice + Best Innovation (MiTra)

PROFESSIONAL EXPERIENCE

Amdocs Development Centre India LLP

Tech Lead — Agent Platform · AI System Design & Implementation

Pune, India · Jan 2026 — Present · Team Lead · Team of 3 · OpenShift · MCP · RAG

- Lead delivery of a zero-code agent platform for production workloads — architecture, roadmap, and execution for a team of 3 on OpenShift/Argo CD.
- Built foundation SDK enabling teams to create business agents and MCP servers without custom code; automated OpenAPI-to-MCP conversion (tools, prompts, resources, A2A cards) with CI pipelines.
- Shipped versioned RAG with ingestion pipeline, rollback, citation-backed retrieval, tool RBAC, and AI/infrastructure guardrails.
- Published Agent Engineering Framework white paper (10 coordinated production disciplines; readiness rubric and design checklist; CC BY 4.0).
- Sole creator of Project Ignite — innovation platform (66 ideas, 30 completed, 21 in progress) with inno-coins gamification and leadership rankings.
- Piloting Trapper: AI agent evolution of Self Heal CD — correlates Bitbucket, tracing stacks, and assertion behavior from current and past runs to produce RCA and automated fix PRs on CI failures.

Amdocs Development Centre India LLP

Software Engineering Specialist — Backend & Innovation

Pune, India · Dec 2022 — Dec 2025 · Kafka · Kubernetes · AI-Assisted Tooling

- Designed Self Heal CD — CI self-healing used daily by 150+ developers; cut release recovery from 2–3 days to 3 green runs per day via failed-test-only reruns (max 3) with convergence detection; only Amdocs Innovation (~2023, BinaryBrains) idea to reach production.
- Built MiTra (Microservice Transformer) migration scaffold; won People's Choice and Best Innovation (2 of 3 titles) at Amdocs Avishkar among 104 teams.
- Architected Java/Spring Boot microservices on Kubernetes with Kafka event-driven integrations (millions of events per hour) across 5 production domains.

Amdocs Development Centre India LLP

Software Developer — Advanced & Experienced

Pune, India · Jan 2020 — Nov 2022 · Backend Microservices · REST APIs

- Developed microservices and REST APIs for mission-critical 24/7 transactional services; production RCA and performance tuning under strict SLAs.

TIBCO Software India Pvt. Ltd.

Junior Consultant — Enterprise Integration

Pune, India · Jul 2017 – Dec 2019 · Java · Event-Driven Middleware

- Delivered enterprise integration services for Macy's, United Airlines, and Indian Railways — Java, SOAP/REST, event-driven pipelines.

CORE COMPETENCIES

AI Systems Engineer, Agent Infrastructure, Agentic AI, LangGraph, MCP, RAG, Multi-Agent Systems, LLM Integration, Prompt Engineering, Tool Schema Design, AI Guardrails, Spring AI, Agent SDK, A2A, Playwright, Local-First Architecture, Distributed Systems, Apache Kafka, Kubernetes, OpenShift, Java, Python, Spring Boot, System Design, Technical Leadership

TECHNICAL SKILLS

AI & Agentic: LangGraph, Langfuse, MCP, RAG, Multi-Agent Systems, Agent SDK, A2A, Spring AI, LLM Integration, Guardrails, Elasticsearch, PostgreSQL, Prompt Engineering, Playwright

Backend: Java, Python, Spring Boot, Microservices, REST APIs, OpenAPI, System Design, LLD, HLD

Data & Streaming: Apache Kafka, Event-Driven Architecture, Couchbase, SQL, Vector Retrieval Patterns

Cloud & DevOps: Kubernetes, OpenShift, Docker, Argo CD, CI/CD, Production Support

OPEN SOURCE & PRODUCTS

Meridian — Local-First Multi-Agent AI Career Platform

Creator & Maintainer · MIT · github.com/vijayptiwari/meridian

Multi-agent pipeline (research, fit scoring, resume tailoring, application assistance) with Playwright integration — local-first, BYOK LLM, deterministic tool boundaries, production-grade run persistence.

Eventore — Multi-Protocol Streaming Console

Creator · Apache 2.0 · github.com/vijayptiwari/eventore

Kafka/Pulsar/RabbitMQ/MQTT/JMS/Kinesis/GCP/Azure console — Spring Boot control plane, Helm/K8s, optional MCP server for AI agents.

Agent Engineering Framework — Production Agent White Paper

Author · v1.2 · CC BY 4.0 · github.com/vijayptiwari/agent-engineering-framework

10-pillar practitioner framework (prompt, goal, trajectory, context, memory, tool, intelligence, execution, governance, evaluation) with readiness rubric and pre-deploy checklist.

EDUCATION

Bachelor of Engineering, Computer Engineering

Savitribai Phule Pune University · Bharati Vidyapeeth's College of Engineering, Lavale, Pune · 2013 – 2017

HONORS AND AWARDS

- Innovation Enthusiast — most innovations in department to date (Amdocs Development Centre India).
- Amdocs Avishkar — People's Choice and Best Innovation for MiTra (2 of 3 titles among 104 teams).
- Amdocs Inspiring Innovator — global nominee.
- TCS CodeVita Season V — global rank 716 (top 0.2% of 400,000+).
