

Vijay Prakash Tiwari

Senior Software Engineer · Tech Lead · Distributed Systems & High-Scale Backend

Pune, Maharashtra, India · +91-9960770157 · vijayptiwariofficial@gmail.com · linkedin.com/in/vijayptiwari · github.com/vijayptiwari · vijayptiwari.github.io

Portfolio & code: github.com/vijayptiwari/eventore · github.com/vijayptiwari/meridian

PROFESSIONAL SUMMARY

Senior Software Engineer and Tech Lead with 9 years building high-throughput, event-driven backend platforms on Java, Kafka, and Kubernetes — pipelines processing millions of events per hour across tier-1 operator environments. Currently leading a team of 3 on cloud-native platform delivery. Department Innovation Enthusiast (most innovations to date); open-source author of Eventore and Meridian.

Impact: Self Heal CD — 150+ developers daily, 3 green runs/day (was 2–3 day recovery) · 2,000+ eng. hours saved/year via release automation · 5 production domains · Avishkar People's Choice + Best Innovation (MiTra) · Team of 3 (current)

PROFESSIONAL EXPERIENCE

Amdocs Development Centre India LLP

Tech Lead — Platform Engineering · Backend & Cloud-Native Delivery

Pune, India · Jan 2026 — Present · Team Lead · Team of 3 · OpenShift · Argo CD

- Lead architecture and delivery for a team of 3 on a cloud-native platform (OpenShift/Argo CD) — SDK design, CI deliverable pipelines, and production guardrails for extensible backend services.
- Built foundation SDK and automated OpenAPI-to-service tooling so product teams ship integrations without bespoke backend code.
- Sole creator of Project Ignite — internal innovation platform with 66 ideas registered (30 completed, 21 in progress); registration, collaboration, awareness campaigns, inno-coins, and leadership rankings across developers through architects.

Amdocs Development Centre India LLP

Software Engineering Specialist — Backend & Microservices

Pune, India · Dec 2022 — Dec 2025 · Platform R&D · Event-Driven Architecture

- Architected Java/Spring Boot microservices on OpenShift/Kubernetes across 5 high-volume production domains — Kafka pipelines processing millions of events per hour in tier-1 operator environments with strict 24/7 SLAs.
- Designed Self Heal CD CI pipeline used daily by 150+ developers — cut release recovery from 2–3 days to 3 green runs per day, saving 4+ hours per developer per release cycle, by rerunning failed suite tests only (max 3 attempts) with convergence detection; only Amdocs Innovation (~2023, BinaryBrains) idea to reach production.
- Built MiTra (Microservice Transformer) — monolith-to-microservice migration scaffold; won People's Choice and Best Innovation (2 of 3 titles) at Amdocs Avishkar among 104 teams.
- Delivered one-click release automation saving 2,000+ engineering hours annually (~50 engineer-weeks) by eliminating manual deployment steps across platform modules.

Amdocs Development Centre India LLP

Software Developer — Advanced & Experienced

Pune, India · Jan 2020 — Nov 2022 · Backend Microservices · REST APIs

- Developed billing microservices and REST APIs on agile squads for mission-critical 24/7 real-time transactional services.
- Resolved production incidents via root-cause analysis and performance tuning; shipped backward-compatible enhancements under strict SLA constraints.

TIBCO Software India Pvt. Ltd.

Junior Consultant — Enterprise Integration

Pune, India · Jul 2017 – Dec 2019 · Event-Driven Integration · Java

- Delivered fault-tolerant enterprise integration services for Macy's, United Airlines, and Indian Railways CRIS — Java, SOAP/REST, and event-driven middleware.
- Conducted performance testing and bottleneck analysis (JMeter, SOAP UI) for presales and production delivery.

CORE COMPETENCIES

Senior Software Engineer, Tech Lead, Solution Architect, System Design, LLD, HLD, Distributed Systems, Microservices, Event-Driven Architecture, Apache Kafka, Java, Python, Spring Boot, REST APIs, OpenAPI, Kubernetes, OpenShift, Docker, CI/CD, Argo CD, DevOps, Concurrency, Cloud-Native Architecture, Production Support, Observability, Performance Tuning, Technical Leadership, Mentoring, Agile

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Node.js, SQL, Shell Scripting

Backend & Architecture: Spring Boot, Microservices, REST APIs, OpenAPI, Swagger, System Design, Solution Architecture, LLD, HLD, SOLID, OWASP

Streaming & Data: Apache Kafka, Kafka Streams, Confluent, Event-Driven Architecture, Couchbase, SQL, NoSQL

Cloud & DevOps: Kubernetes, OpenShift, Docker, Argo CD, CI/CD, Jenkins, Git, Maven, Release Automation, Production Support

Practices: Agile, Code Review, Incident Management, RCA, Performance Testing, JMeter, Technical Leadership

OPEN SOURCE

Eventore — Multi-Protocol Streaming Console

Creator · Apache 2.0 · github.com/vijayptiwari/eventore

Production-oriented control plane for Kafka, Pulsar, RabbitMQ, MQTT, JMS, Kinesis, GCP Pub/Sub, and Azure Service Bus — Spring Boot backend, Helm/Kubernetes deployment, optional MCP server.

Meridian — Local-First Multi-Agent Career Platform

Creator · MIT · github.com/vijayptiwari/meridian

Multi-agent pipeline for job research, fit scoring, and resume tailoring — local-first, deterministic tool boundaries, production-grade run persistence.

EDUCATION

Bachelor of Engineering, Computer Engineering

Savitribai Phule Pune University · Bharati Vidyapeeth's College of Engineering, Lavale, Pune · 2013 – 2017

CERTIFICATIONS

- CD215: Couchbase Java Developer Course — Couchbase (Apr 2023)
- TCP-TIBCO BusinessEvents Certified Professional — TIBCO (May 2018)

HONORS AND AWARDS

- Innovation Enthusiast — most innovations in department to date (Amdocs Development Centre India).
- Amdocs Avishkar — People's Choice and Best Innovation for MiTra (2 of 3 titles among 104 teams).
- Amdocs Inspiring Innovator — global nominee (only Asian among nominees).
- DevOps Champion — Amdocs Development Centre India.
- TCS CodeVita Season V — global rank 716 (top 0.2% of 400,000+ participants).
